

If any policy is implemented national,I don't want to see any proposal that would lessen Indiana's Telephone Privacy law in way. Since this law went into effect, we have only had a couple calls and one of them I wouldn't call a tele-a-marketer call. Since we are retired and don't have need for any of these calls, is sure has been nice. Wish we had the same thing for e-mail as I spend nearly an hour each day deleting them. I'm liable to be on someones doorstep if we lose the IN Phone Privacy law we now have.
